PAWAN KUMAR KASAUDHAN

Full Stack Developer — MERN Stack

8447957993 — pawank273212@gmail.com — Noida, Uttar Pradesh

LinkedIn — GitHub — GeeksforGeeks — LeetCode

Professional Summary

Full Stack Developer with hands-on experience building web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs. Experienced in developing responsive frontend interfaces, backend APIs, authentication systems, database integration, and deploying applications using Vercel and Render. Strong foundation in JavaScript, DSA, DBMS, OOP, and problem-solving, with 150+ coding problems solved on LeetCode and GeeksforGeeks.

Education

Bachelor of Technology in Information Technology June 2026
JSS Academy of Technical Education, Noida

Technical Skills

- **Languages:** JavaScript (ES6+), C++, Python, SQL, HTML, CSS
- **Frontend:** React.js, Vite, Tailwind CSS, Context API, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Bcrypt
- **Database:** MongoDB, MongoDB Atlas, Mongoose, SQL
- **Tools & Deployment:** Git, GitHub, Postman, Vercel, Render
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

Expense Tracker — GitHub *React.js, Vite, Chart.js, Context API*

- Developed a React-based expense tracking application for managing and categorizing income and expense transactions.
- Implemented Context API for centralized state management and efficient data sharing across components.
- Integrated Chart.js to visualize spending patterns across multiple expense categories.
- Fixed Chart.js lifecycle and canvas rendering issues during component re-renders and state updates.

ResuMate – AI Resume Analyzer — GitHub *React.js, Node.js, Express.js, MongoDB, JWT, Groq AI*

- Built a full-stack resume analysis platform that analyzes PDF resumes and generates ATS scores, improvement suggestions, and keyword recommendations using AI.
- Developed REST APIs with Node.js and Express.js for resume processing, user management, and job description analysis.
- Implemented JWT-based authentication and bcrypt password hashing with protected routes.
- Built a Job Description Matcher to compare resumes against job descriptions and identify missing skills and keywords.
- Deployed the frontend on Vercel, backend on Render, and database on MongoDB Atlas.

PrepAI – AI Mock Test Platform — GitHub *React.js, Node.js, Express.js, MongoDB, Groq API*

- Developed a full-stack AI-powered mock test platform for technical interview and placement preparation.
- Integrated Google OAuth 2.0 and JWT authentication for secure user login and account management.
- Integrated Groq API to dynamically generate technical MCQs while using MongoDB session history to reduce question repetition.
- Built an interactive test interface with countdown timer, question navigation, automatic submission, and result evaluation.
- Developed a performance dashboard to track historical scores and identify users' weak areas.

Achievements

- Solved 150+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks.
- Strengthened problem-solving and competitive programming skills through consistent practice.
